

## Metadata description – Milestone 3.1 – Spatial dataset on harvest and marine subsistence use in Nordkapp municipality, Porsanger fjord

Name of dataset (incl. internal ID and doi number):	Spatial data on resource users' harvest and marine subsistence activities in Repvåg and Stranda, Nordkapp municipality.
Project:	FutureArcticLives
Work package	3
Data owner (i.e. institution)	UiT – the Arctic University of Norway
Involved researchers (collecting or using the data)	Camilla Brattland, Bente Sundsvold, both UiT – the Arctic University of Norway
Where can the data be obtained (i.e. link to repository)	<a href="#">DataverseNO</a>
Terms of use (link to license agreement)	<a href="#">DataverseNO Deposit Agreement</a> ← <a href="#">info: DataverseNO (uit.no)</a>
Contributing to which objective in FutureArcticLives	Provide input to the development of an adaptive ecosystem-based approach for indigenous and small-scale marine resource management in northern Norway
Data collection procedure (link to protocol, questionnaire etc.)	Map-based interviews in person, recorded, transcribed, schematic part of interview transformed into shapefile for integration and viewability with ArcGIS desktop and online software.
Variable names	Place name
	Activity
	Whether the activity is for traditional use/subsistence, commercial use or recreation
	Information code number
To-do-list for data wrangling	
Version number and changes made since previous version
